Gentlemen

Your solid waste disposal facility located west of Decatur was inspected on November 14, 1980, by Ms Lynn A Grills, representing this Agency

The inspection disclosed the following conditions, which constitute violations of the Illinois Environmental Protection Act and Chapter 7 of the Illinois Pollution Control Board's Solid Waste Rules and Regulations

Daily cover is not being provided adequately along the southeastern area of the berm All solid waste received daily must be covered with a minimum of six (6) inches of compacted suitable natural earthen material by the end of that day's operation

Large amounts of windblown litter were observed in and around the site All litter shall be collected from the sanitary landfill site by the end of each working day and either placed in the fill and compacted and covered that day, or stored in a covered container It is suggested that arrangements be made to provide portable fencing on the leeward side of your unloading site to trap windblown litter Routine policing should also be provided for the site and surrounding area Under severe conditions, it may be necessary to cover the solid waste at frequent intervals during the day

Waste Hauling, Inc

The salvage operations, which you conduct at your site, are not in accordance with the Rules and Regulations. We suggest you immediately discontinue this operation and either remove the stockpiled material to a salvage yard or deposit and cover the material in the landfill.

Your early compliance in this matter will be appreciated. In the event that you have any questions regarding compliance, please feel free to contact Ms. Lynn Grills or me at the above number.

Sincerely,

Monte M. Nienkerk
Central Region Manager
